

## What did we achieve in 2023?

**31% reduction in CO<sub>2</sub> emissions**

vs 2019 compared to a -25% target

**0% of waste**

generated on site sent to landfill

Achieved Level 3 Airport

**Carbon Accreditation**

Phase 1 of the Airport Solar Farm completed providing **providing 100% of the Airport's electricity** requirements on a sunny day

Over **40,000m<sup>2</sup>** of additional hedgerows created on Airport land

**35%**

passengers coached to their aircraft were transported by an

**electric vehicle**

**Sustainability sector leader**

status achieved in the annual **GRESB** assessment

**Green Travel Plan**

launched to colleagues

**THE GREEN TRAVEL PLAN**

**Additional electric vehicles purchased**

as part of our transition to a **fully electric fleet**

**...and much more!**

## What are we hoping to achieve in 2024?

Undertake **Phase 2** planning for the **solar farm**

Achieve a further **reduction in our CO<sub>2</sub> emissions** compared to our 2019 baseline

Encourage the use of **Sustainable Aviation Fuel** by our **airline partners**

Start the process for resurfacing our runway and replacing all of our landing lights with **energy efficient LED lights**

Investigate the use of new **next generation bio-diesel fuels**

Continue transitioning our **vehicle fleet** to electric versions

Undertake feasibility studies on a range of **renewable energy** projects
